TruGen3
Three Generations of Truth in Nutrition

Formulated by Ophthalmologists

- 1 Provides the precise amounts of lutein and zeaxanthin, and other powerful antioxidant vitamins and minerals to support macular degeneration.† These key nutrients have shown superior results for healthy vision in the AREDS 2 trial conducted by the National Eye Institute.
- 2 Lutein and zeaxanthin can also help protect your eyes from harmful high-energy light waves like ultraviolet rays in sunshine
- 3 Contains active forms of Vitamin C, Vitamin E, Calcium, Zinc, and Copper for optimal macular degeneration support.

BENEFITS OF TRU M.D. SUPPORT

Vision

- ✓ Triple Lab Tested (ISO17025)
- ✓ GMP Certified
- ✓ Non-GMO
- ✓ Dairy Free

Antioxidants for Healthy Vision

In addition to lutein and zeaxanthin, the healthy ocular lens is enhanced with the antioxidants vitamins C and E, which play a vital role in controlling the production of oxygen and light-induced free radicals. Zinc is an essential mineral that has been shown to support visual transduction in the rod cells.

A double blind, placebo controlled trial of zinc supplementation, found a significant reduction in visual acuity loss associated with macular degeneration. †5

AREDS-2 Study

Though the supplement formula recommended by the original AREDS included beta-carotene as the only carotenoid, succeeding studies, like the AREDS-2, found that replacing beta-carotene with lutein and zeaxanthin significantly reduced the development of macular degeneration. † 6,7 TRU M.D. Support® formula contains the essential nutrients from the AREDS-2 study and reflects these positive results.
